

Survey for Story Generation Model

This survey evaluates videos created through synthesis models, where synthesis models generate visual content based on provided prompts. Please review these generated videos and assess their realism on a scale of 1 to 5, with 5 representing the highest level of realism. The task involves comparing the video content with its corresponding prompt to determine how accurately the synthesized video aligns with the intended storyline or scenario.

Reviewing Process:

1. **Watch the Video:** Please watch the video provided.
2. **Corresponding Prompt:** Compare the content of the video with the corresponding prompt.
3. **Evaluation:** Determine whether the video accurately represents the story outlined in the prompt.

Warning: These videos are generated from the alpha version, and there might be minor discontinuities or inconsistencies between the video and the prompt. Your focus should primarily be on assessing the general alignment rather than minor discrepancies.
